

How to intall Dome Camera

1- Firstly, loosen this cover

2- When you remove the above cover, there will be three holes for mounting to the wall or ceiling. There were accessory bags included inside camera box.

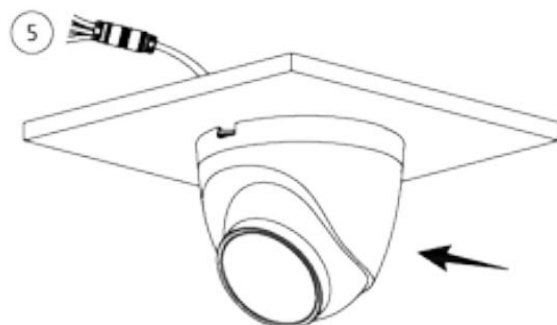

3- And also there are two gaps on the camera base, if your camera is for ceiling mount, the cable will go through the roof so you can keep the gaps.

And if your camera is for wall mounting, you can cut each of the gap to let the cable through.

Ceiling mount

Wall Mount

4- This part is needed when there is waterproof connector in the package if necessary.
